**Tsawwassen Residents Against
Higher Voltage Overhead Lines
(TRAVHOL)**

Care of:

Messrs. Cecil Dunn & Neil Atchison

I am writing to you in support of your position against the proposed installation of these higher voltage, higher capacity, power lines in the existing Tsawwassen right-of way.

This issue has caused me some mixed feelings. On the one hand I don't wish to see anything that would blight the skyline of Tsawwassen nor harm any particular landowner. On the other hand, development proposals of one form or another usually have positive attributes and negative attributes that should be looked at, on balance, in their best light. It struck me, however that this proposal has no positive attributes for Tsawwassen at all.

Furthermore, there appears to be alternatives presented in your position paper that make more sense and causes conflict with a more limited number of people. Alternative Route 1 appears to entirely miss the current Tsawwassen First Nation reserve lands and seems the most sensible alternative. I would think that the relatively small extra cost involved in this alternative will be absorbed by the project quite easily.

If I can offer any further assistance to you, please let me know.

Sincerely,
Century Group

Sean Hodgins, CMA
